## FUN FACTS

This country is a segment of the "Ring of fire" which is the most violent volcano and earthquake-prone zones in the world.

The snake or the rattlesnake appears repeatedly in Mexican mythology and is considered to be a perspective on life, death and transition between these two. Kukulcan, the serpent god is found on one face of the Chichen Itza pyramid and Quetzalcoatl, the feathered serpent god are just a couple of indications of this belief.

Mexico's Chichen Itza pyramid is one of the "Seven manmade Wonders of the World"
